

Consumption of Bread Declines

The following table prepared by the International Institute of Agriculture at Rome and published in the Seattle grain report shows that one of the reasons for the decline in wheat is decreased consumption. While this could by no means be a prominent factor in the situation, it is one of the straws that shows how the wind blows.

Four Candidates Will Contest Two Vacancies in Council

There was a very satisfactory turnout of electors at the annual Village meeting on Monday night. Five nominations were placed with the returning officer as follows: E. Latiff, J. Brown, A. McCullough, G. L. Depeu and C. McLean. Mr. Latiff has since withdrawn, leaving four contestants for the two vacancies in the council.

This meeting was the best of its kind held here for some

years and the increased interest shown, especially on the part of the business men was gratifying. With G. A. Orr in the chair considerable discussion took place re Village affairs, and it is quite evident that without talking about it very much, many of the ratepayers have been taking an intelligent interest in municipal affairs.

Voting will take place on Tuesday, Feb. 10th, from 2 to 9.

Dr. Margaret Owens In Interesting Lecture

Dr. Margaret Owens of the Provincial Department of Public Health addressed a large and keenly interested audience in the United Church on Monday evening at 8 o'clock on health hygiene and sex instruction. Mrs. Alcock president of the Women's Institute introduced the speaker who described adolescence as a second birth and just as sufficient sleep and a well balanced diet were an impetus to the growth of the child during the first year of life, so in adolescence were the food requirements enormously increased in order to attain the full development of physical structure and the reproductive system which is the establishment of the race. Nature has given a ravenous appetite at this time and it should be satisfied with the right foods. Milk should be the basic principle of diet, one quart a day for each child being the minimum. In addition foods prepared with milk, butterfat and eggs. The importance of green vegetables rich in mineral matter preferably eaten raw and raw fruit was stressed by Dr. Owens. White bread was referred to as so much concentrated starch, the whole wheat bread containing vitamins necessary for growth. A teaspoonful of cod liver oil three times a day was recommended during the strain of

growth as a possible preventative of the early beginnings of tuberculosis which may show itself at this period. In order to have a well functioning brain in a well controlled body, able to stand the wear and tear demanded at every turn, a minimum of ten hours sleep should be allowed to every child between the ages of twelve to sixteen years. The risk and harmful effects of overeating through the present social and educational system being mentioned. Other difficulties of the adolescent years were explained and Dr. Owens urged her listeners to establish in the child mind an attitude which gives it the best possible protection against unwholesome influences. Start the child in baby days with right thinking, teaching self control and making the home the background of sex education. A great safeguard for every child during the adolescent period is activity such as any form of sport said Dr. Owens opens new channels for the growing energies so that the mind being constant'ly occupied will be kept off the wrong track. Opportunity was given for questions to be asked after which a hearty vote of thanks was tendered by Mrs. Beaulieu on behalf of all present. Dr. Owens left on the south-bound train for Macleod.

Mr. and Mrs. Ryan Royally Farewelled

Under the leadership of the Elks and Royal Purple lodges the community at large gathered in the Community Hall on Tuesday night to do honor to Mr. and Mrs. W. S. Ryan, prior to their departure for Warner on Thursday. The local crowd was reinforced by some thirty Elks and their ladies from Stavely, and for one more occasion the hall was by no means too large.

A musical programme, which included a duet by Mrs. Allen and Mrs. Hall of Stavely, was interspersed by short speeches by the chairman, G. M. Campbell and Messrs. Orr, A. M. Watt, Moffatt, Patterson representing Champion, while Mr. Gibson of Carnarney and M. Malchow of Stavely, added to the eloquence of the evening, all expressing appreciation of Mr. Ryan's connection with the bank here and regretting his departure, while Mrs. Ryan's social activities also received due attention.

H. E. Gill made the presentation of a set of pipes and and smokers' accessories to Mr. Ryan and a silver fruit stand and candle holders to Mrs. Ryan. Horace was at his best for the occasion and his address and the acknowledgement of the recipients were among the features of the evening.

The banquet which followed was a decided credit to the culinary and decorative ability of those in charge and was thoroughly enjoyed. Dancing was then indulged in until the early hours, local talent supplying the music.

Mr. Ryan has been manager of the Canadian Bank of Commerce for the past seven years, and during that time has made many friends. His transfer to Warner, while in the line of promotion, removes a well known figure from town to the regret of many associates. Mrs. Ryan has been active in P.T.A., Ladies' Aid, W.I. and other circles and will be badly missed in these connections. All will join in extending their very best wishes to Mr. and Mrs. Ryan in their new home.

Farm Authority To Visit Champion

Roy R. Smith, assistant to J. G. Haney, superintendent of International Harvester Company demonstration farms, will be here to help with this meeting on Monday, Feb. 9.

Mr. Smith has been a farmer and knows the problems confronting the Northwest farmers of today. He graduated from the Iowa State agricultural college over 20 years ago, with a Master's degree. Since then he has farmed for himself, been a farm manager and a County agricultural advisor. He believes in the future of safe farming and has facts, figures, and experiences to prove all his statements.

The International Harvester Company is operating four demonstration farms in the Northwest, one at Gull Lake, Saskatchewan; one at Oak Lake, Manitoba; one at Larkmore, North Dakota, and one near Aberdeen, South Dakota. All these farms are being operated on a practical basis. The system of farming used on each farm is a crop rotation suitable to the district, together with live stock and weed control. There is nothing impractical in this system of farming. These demonstration farms have shown a nice yearly profit, which could also be realized by more farmers of this community on their own farms.

Corn, alfalfa, sweet clover, garden, pit silos, cows, hogs, chickens, and weeds, all will be discussed by the speaker on Monday Feb. 9, at 2 p.m., in the Community Hall.

Mr. Smith will illustrate his lecture with charts, moving pictures and lantern slides. He will be glad to answer any questions you may have on diversified farming or weeds. You can well afford to attend.

It is your meeting; you and your neighbors are putting it on. It will help to build the community.

Sure Cure For the Blues, And What Have You!

Final arrangements are being made for the forming of a badminton club in Champion. G. M. Campbell is installing the courts in his hall and will be ready for play next week. This is a real game that is sweeping the country like a storm. It is not unlike tennis and is a much better game than miniature golf, as it gives you a chance to exercise every muscle in your body and every boy and girl from 10 to 80 years will be fascinated by it.

J. T. Stephenson has been confined to the house most of the week with a bad attack of neuralgia. He has improved slightly the last day or two.

United Church Annual Meeting Proves Interesting Affair

The Annual meeting of the United church of Champion, Blusun and Sanderson was held in the United Church on January 30th, when various organizations of the congregation reported on the activities of the year. Rev. Peter Dawson acted as chairman and Mr. R. L. Baker as secretary.

The Peppy Pals club has a membership of 10 and is under the leadership of Miss B. McFall. The year's activities consisted of mother and daughter banquet in May, a vespers service and social evening on Dec. 10th, training in business procedure, religious training and developing of the group spirit. The T.R.V.'s, under the leadership of Miss Archer has 14 members. This group joined with the Peppy Pals on a hike to Milfin's coulee early in May; the group project work was the weaving of red mats and for 1931 their aim is the weaving of cake baskets, for devotional exercises the reading of a book "The People of Japan." The "Native Sons" Tennis square have a curriculum of 10 and met with Mr. R. L. Baker as tutor.

These "Native Sons" have been doing work towards winning the games' badge and the motor mechanics badge. Mr. Adelman has very kindly been giving a series of talks on motor mechanics. The square organized a picnic last year under the competent coaching of Mr. Fairies, the school vice principal. The boys decided to call the team the "Champion High School team" but to keep it under the control of the square for organization and finance purposes. The team has twice defeated the town senior team but owing to the disappearance of the ice has not been able to play any outside teams. In the devotional periods the boys have been studying some "Older Boys Problems" which are calculated to help the boys make right decisions in the perplexing questions they have to decide. The Prairie Wives organized on Nov. 8, with an enrollment of 8, the Rev. Peter Dawson as mentor. The aim of this group of Trail Rangers is to train the boy for leadership and the carrying out of the fourfold programme—physical, mental, moral and spiritual. (Continued on back page.)

THURSDAY, Feb. 8, 1931

NOTES AND COMMENT.

The most appealing idea promulgated from the U.F.A. convention was that automobile licenses should be reduced to \$2.00 each. The man or local who produced that one had a real head and deserves congratulations all round. If it could only be put into effect for the balance of this year?

The wheat Pool is going to take a vote among its members in regard to their opinion of a 100 per cent wheat pool. It is hard to believe this proposal will meet with any great amount of favor in the districts where wheat is the main crop, in fact in this section, the Pool will lose a considerable number of its present members at the first opportunity, unless sentiment changes completely. Wheat pool officials and some outside authorities or supposed authorities, seem to have more confidence in the Pool than many of its members.

The cancellation of war debts is again receiving attention. The ground for such cancellation is that the diversion of payments of interest and principal on war debts to the regular channels of commerce would hasten world recovery from the present depression. The United States and Great Britain would do the cancelling, the former occupying the chief role. Naturally the debtor nations would benefit financially from such action but it is difficult to say whether the nations cancelling the obligations would reap the benefit in increased prosperity.

There is considerable reason why the owner of a motor car should receive a bonus instead of being charged a license fee. It is only the beginning of the expense for the year, and any curtailment of the number of cars in use would be disastrous to many lines of business. Why not in such a case make the use of a car more attractive by omitting license fees at the very least.

A section of the United Farmers of Canada in the vicinity of Wilkie, Sask., have originated a set of demands which goes the limit in the radical direction. The main body of the organization has disowned them but there is no doubt such ideas as they are promoting are very prevalent among members of the U.F.C. While it is a matter of regret that desperate circumstances should cause threats of secession, there can be no doubt in anyone's mind that steps should have been originated before this to meet the situation.

It appeared as though Saskatchewan had furnished a real sport in the field of politics when David McKnight decided to take advantage of the ballots having been tampered with before a recount which changed a majority of five for his op-

ponent to a minority of thirteen. It seemed too good to be true in the first place but since Mr. McKnight has changed his mind things are again normal. His counsel in the recount seems to have been the only man opposed to the latest move.

World shortage of gold fore-shadows early revival of mining in Canada, particularly in Northern Ontario, where prospecting on a large scale for new deposits is being warmly encouraged, said Hon. Dr. R. J. Manion, minister of railways and canals.

People holding public positions, from the newspaper point of view, should not be too sensitive to comment. Sometimes such comment, whether it be pleasant or otherwise, is the only indication the public have that the individuals involved are alive.

Clerk—"And you get an extra pair of pants with this suit." Scotchman—"Throw in a overcoat and I'll take it."—Col. lege Humor.

"What kind of business do you think women are fitted for?" "M'm—well, most any kind except minding their own."—Unidentified clipping.

Father—"Why were you kept in at school?" Son—"I didn't know where the Azores were." Father—"Well, in the future just remember where you put things."—The Gas Line.

Bursting open the door marked "Private," the butcher confronted the local lawyer.

"If a dog steals a piece of meat from my shop, is the owner liable?" he asked the man behind the desk. "Certainly," replied the lawyer.

"Very well, your dog took a piece of steak worth half a dollar about five minutes ago."

"Indeed, he returned smoothly. "Then if you give me the other half, that will cover my fee."—Wall Street Journal.

To a great many persons the apple has become breadfruit. "Then if you give me the other half, that will cover my fee."—Wall Street Journal.

The boys will soon be playing ball, the birds will be singing and the drills will be humming. In the meantime if you want to sell anything, buy anything, if you have lost or found something, the thing to do is to use a "Want Ad." in The Chronicle. Its the cheapest and most effective means of achievement.

Canada Has Taken Adequate Measures For The Protection And Propagation Of Game

The early history of Canada, its exploration and development, is very closely woven with the story of the wild life of the country. The fur was the lure which led the early trader and adventurer to penetrate the interior of the country while the game provided a means of sustenance, not only to the traders and explorers, but also in a large measure to the early colonists.

In those early days every species of game native to the North American continent, including buffalo, elk, antelope, moose, deer, caribou, muskox, mountain sheep, mountain goat, bears, wolves, cougars and other small game and fur-bearing animals, as well as game birds of all varieties, were plentiful everywhere within their native range throughout Canada. Owing, however, to the advance of settlement and the increasing factors of civilization the vast supply of game became greatly depleted. In fact, certain species such as the buffalo, elk, antelope, and muskox were in serious danger of total extermination.

Happily, however, the situation has been met by the Federal and Provincial Governments of Canada and means have been taken to protect and conserve all useful and other wild life. The provincial authorities drafted laws conserving the game and at the same time created areas for their complete protection.

The Federal Government's contribution to the cause of game protection includes the establishment of six reserves in the Northwest Territories and the Province of Alberta, with an area of 546,827 square miles, 43 bird sanctuaries with an approximate area of 1,000 square miles in which the birds receive absolute protection throughout the year, 51 public shooting grounds with an area of 700 square miles, where birds receive protection during the nesting and rearing period, and the absolute protection of all game, fur-bearing animals, and birds in the eight great National Parks, having an approximate area of over 12,000 square miles.

As these parks and reserves are located in practically every section in Canada all animals and birds are propagated upon their native range and every species of Canadian native wild life has been saved to posterity. In fact, certain species which are not native to Canada have been introduced successfully and add materially to the value of the country's wild life.

Canada welcomes sportsmen to share in her plentiful supply of game and no vast her hunting districts and so diversified are the conditions that the hunter, no matter what his preference, is sure to be satisfied. The entire country is opened up by highways, railways, steamship or air lines so that the sportsman is conveyed in comfort to his "going-to-the-sun" point. At established points he will find accommodation and also outfitters who are prepared to furnish guides, canoes, camping equipment, pack trails and everything necessary for a trip through the country in which he desires to hunt.

Braille Books Circulated
A sightless one of the most interesting activities of the Canadian National Institute for the Blind was given at a recent meeting of the directors. It was stated 2,902 volumes in Braille, or raised type, had been circulated by the institute's library in October, throughout Canada and in parts of the United States, and even in Mexico. The circulation was 500 volumes greater than in October, 1929.

Natural Gas Consumption
The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 640,000 tons of coal. Natural gas is found in abundance in Alberta and in some parts of Western Ontario.

Hungary is increasing all inland postal rates.

"If you wish to get aim, you must take nothing, but a few drops of water a day."

"Before or after meals?"—Esquima, Barcelona.

The Weak Link

Lowering Production Costs On Farm Is Necessary

"If there is one weak link in the chain of farm operation today it is in the farm's production of farm products, home grown, produced at cost," asserts G. B. Rothwell, Dominion Animal Husbandman, Department of Agriculture, Ottawa. In the final analysis the low acre unit production is largely the reason for high cost milk, admitting all the imperfections and low average production of our cows. The farmer's one and only salvation today is in lowering production costs under his control, i.e., on his farm.

Alberta Creameries

Receipts For Eleven Months Reach Total Of 14,452,068 Pounds

Receipts of cream in Alberta creameries were more than 40 per cent. greater during November than during the same month of the previous year, the figures being \$11,480 pounds of butter fat as against 575,185 pounds, according to C. P. Mark, dairy commissioner. Receipts for the eleven months reached 14,452,068 pounds an increase of about ten per cent. over the corresponding previous eleven month period.

(By Eva A. Tingey.)

LOVELY NEW SPORTSWEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York. Figure is such a fresh addition to the trended frock. It has a way of becoming soiled easily, however—and goodbye chic! The busy woman—who among us is not busy—can therefore only hope for such touches on her frock to be easily removable for laundering.

Note today's model how extremely easily the pique blouse can be reconditioned. The front, broader one is a straight strip, bowed and passed through one slot and the closure is shown. On the sleeve narrower strips are similarly passed through two slots. You will note they decorate the upper arm an area of the newest Paris dresses that has suddenly assumed much importance. Other fairly fair woolsens besides trend can be used for this dress.

This pattern may be obtained in sizes 12 to 20 and 24 to 40. It is sent for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address. The number of the pattern and the size you want.

Dollar Wheat

Livestock Used As A Medium For Marketing Grain At Fair Prices

Most people today think Dollar Wheat a thing of the past. But this is not necessarily the case when livestock is used as a medium for the marketing of this essential grain. Values as high as five dollars per bushel when fed to hogs and sold in the form of eggs on the winter market are claimed by feeding experts. But particularly timely and interesting is the finding of the Dominion Experiment Station at Lacombe, Alta., which places per bushel value of wheat at the following figures:

With Pork	Wheat fed	Barley fed
Selling Price	Pigs	Pigs
11c. per lb.	\$1.48 per bu.	\$1.00 per bu.
12c. "	1.52 "	90 "
13c. "	1.56 "	80 "
14c. "	1.60 "	70 "
15c. "	1.64 "	60 "
16c. "	1.68 "	50 "
17c. "	1.72 "	40 "

Radio On The Farm

More Important On The Farm Than Any Other

"Information can be just as pleasant as entertainment" asserted Dr. J. H. Grieden, Federal Deputy Minister of Agriculture, speaking at Ottawa recently. "The radio is important to agriculture. The young people are becoming daily more important on the farm and they want radio entertainment. Radio provides this; it keeps the farmer in touch with the market situation and weather conditions, and it also keeps him in touch with the news of local and world happenings. I think radio is more important in the farm home than in any other home. It brings the world to the front door."

Back To The Farm

Keen Interest Is Expressed By Farmers In Broad Sow Policy

A new significance attaches to the old familiar slogan "Back to the Farm" in the way of the Broad Sow Policy enunciated by the Hon. R. Weir, Federal Minister of Agriculture, at the Royal Winter Fair, is working out. In the first month in full operation over five hundred sows of the select bacon type have been saved from slaughter, bred, and sent back to farms. Saskatchewan and Alberta lead in the number of orders placed but keen interest is evidenced all over Canada. Sows of suitable type are provided farmers at cost, with a further saving of one-half the cost of freight from the stockyard to the buyer's farm.

Byng Not Resigning

Lord Byng, former governor-general of Canada and present head of Scotland Yard, is understood to have denied that he will resign as chief commissioner of the London Metropolitan Police. Lord Byng has been absent, through illness, from his post for many months.

She: "Now what are you stopping for?"
He (as car comes to halt): "I've lost my bearings."

"Well, at least you are original. Most fellows run out of gas."

KING CAROL AND YOUNG SON

A Birmingham steel manufacturing firm has decided to open branch works in Canada, probably Quebec.

A Leicester textile firm and another Birmingham organization in the engineering trade are also seriously considering similar steps, while many other firms have made enquiries.

Miniature gasoline pumps, fitted with lead pencils, have appeared as desk decorations in Europe.

The King of Spain will sell his race horses.

HOME UNDER POLICE GUARD

Judge Emerson Coutsworth, senior police magistrate and the acting chairman of the board of police commissioners at Toronto, whose home is under police guard following a mysterious threat over the telephone to burn it down.

Cod Liver Oil For Poultry

Suitable In Crude State and Is Not Expensive

An abundant supply of Vitamins required to keep laying hens producing and healthy during the long winter months when they are shut in. It is the presence of this vitamin which assists assimilation of the minerals calcium and phosphorus in the production of eggs and egg-shells. As the value of cod liver oil for poultry feeding depends entirely on its vitamin content only reliably tested brands should be used. Crude cod liver oil is suitable for poultry and is not expensive.

In the dry mash feed one pint of oil to each hundred pounds of mash is a good ratio, while with a wet mash or other feed one to two teaspoons to each twelve birds has been found adequate.—Dominion Experimental Farm Note.

New Signs Suggested

A Houston (Texas) man declares that finger signs at railroad crossings are based on the wrong psychology. He says, tell a man to "Stop, Look and Listen," and he is impelled to do none of the three. He suggests for railroad crossings:

"Don't stop. Nobody will miss you."
"Take a chance. You can get hit by a train only once."

"Don't stop. Nobody will miss you."

"Take a chance. You can get hit by a train only once."

Government Radio Stations Broadcast Programs To Inhabitants Of Far North

Information About Eggs

Eggs Are Rich In Protein, Vitamins and Minerals

Two tons of grain will produce 400 dozen of eggs. Sold as grain at a price of 31 per cent. it would be worth \$60. Sold as eggs at 25 cents per dozen it would be worth \$125.

An egg is 60 per cent. water, 13 per cent. protein, 10 per cent. fat and 11 per cent. lime or ash.

In an egg 60 per cent. is white, 30 per cent. yolk, and 10 per cent. shell.

An egg weighing two ounces holds approximately 70 calories in fuel value.

The egg is aptly termed "bottled sunshine." It is rich in protein, vitamins and minerals.

Of the five vitamins the egg supplies Vitamins A, B, D and E. It is particularly rich in "D" the sunshine vitamin.—Department of Agriculture, Ottawa.

Douglas Fir Stands Test

Great Britain Favors Railway Ties From B.C. Satisfactorily

Last summer a consignment of Douglas fir railway ties was forwarded to Great Britain for experimental purposes and subjected to existing tests by the Forest Products Laboratories in London, England. These were of a thoroughly practical character and resulted in their being declared highly satisfactory. As one of the first consignments the representative of the British Columbia Government in London, England, has been approached concerning another shipment of about 200,000 of these ties.

Railway managements of the consolidated systems into which the British roads are now divided are said to have been keenly interested in the tests and if prices are satisfactory most large orders may follow. The total requirements are immense but the Pacific coast has equally vast supplies of Douglas fir from which they can be mined without difficulty. Millions, indeed, can be supplied, whenever needed, to the advantage of both parties.

Don't Overfeed

Bacon Type Of Hog Which Brings Money To The Producer

With an abundance of low priced coarse grains and wheat available there is an apparent tendency on the part of farmers to overfeed their market hogs. This is shown by the increase in the average weight of hogs now coming onto the market.

The two hundred pound hog is the ideal market weight. A. A. Macmillan, Chief of the Sheep and Swine Division of the Federal Department of Agriculture, points out. With the price of land what it is today, relatively lower than the price of bacon, it is the bacon type which means money to the producer. Farmers should watch hog feeding closely to guard against both light weight and excess fat—he must keep away from the out-weight grades if he is going to get the top of the market for his hogs.

Seed Production

Thousands Of Bushels Of Registered Seed Produced In The Maritime

The objective of the seed production policy of the Federal Department of Agriculture is a suitable and continuous supply for Canadian farmers through conveniently localized production. Digby and Yarmouth counties in Nova Scotia have produced 1,700 pounds of registered and 2,500 pounds of commercial turnip seed for 1930; many thousands of bushels of registered seed oats have been produced in the Maritime provinces, together with considerable quantities of registered seed wheat and barley; while Prince Edward Island and New Brunswick have districts in which seed of a particularly high quality is available for Maritime supply during the 1931 crop year.

Mechanical Egg Sorter

Five persons can sort and candle 50,000 eggs a day with the aid of an improved machine introduced in Germany. It automatically tests the eggs, weighs them and distributes them into five different grades for sale.

The traditional stunts of the Arctic have been broken by government radio stations broadcasting news and special programs to the ice-bound inhabitants of Canada's far north. It was announced by Hon. Alfred Durnan, minister of marine. No longer will it be necessary for Hudson Bay factors, miners, trappers and prospectors to wait months, and sometimes years, to learn who won the world series, the results of Canadian, British or United States elections, how their favorite hockey team is progressing or the names and accomplishments of the latest world celebrity.

Through the government chain of radio stations in the north all such news now is relayed to them a few hours or days after it has taken place. The insulation of the system was accomplished a few days ago and already the results have justified the investment. From Canadian Island stations, from Canadian Bay factors, miners, trappers and prospectors to wait months, and sometimes years, to learn who won the world series, the results of Canadian, British or United States elections, how their favorite hockey team is progressing or the names and accomplishments of the latest world celebrity.

One of the chief duties of the stations is to broadcast the latest "Social News" of the north. When a trader or trapper leaves a post for another settlement, this is sent over the air and if he does not send it his destination on time, immediate orders are made to locate him. Personal messages from "home" are sent out to missionaries and traders which might take months to reach them if sent by mail.

Receiving sets are becoming standard equipment with the men of the north. They are hooked upon the radio, and necessary as dogs, guns or heavy clothing.

Canada's Blueberry Industry

Figures As To Exact Volume Of Production Not Obtainable

Blueberries represent probably Canada's greatest unorganized industry. No modern methods for cultivating or harvesting have as yet made their appearance in the Dominion, and only a superficial idea of the volume of production is obtainable. They represent both a fresh and frozen fruit trade and at the present time there are some 600,000 lbs. held in storage for the baking trade. Only about one-tenth of this quantity will be used in Canada.—Department of Agriculture, Ottawa.

Frog Farming

Manitoba Farmers Have Put Frog Raising On A Commercial Basis

Farmers living at Vita, Man., have discovered a new "mortgage lifter," easily the equal of the homely pig in frogs. What was formerly a local pest has been turned into a valuable commercial asset. Frog production has been placed on a purely commercial basis by this group of enterprising farmers, whose output is now rated in tons and finds a market at good prices in the hotel and restaurant trade in Eastern Canada and the United States, where frog legs are esteemed a table delicacy.

Spain produced more than 7,000,000 tons of coal in the last 12 months.

Tests indicate that oxygen is deadly to mosquitoes in the larval stage.

SOLAR STONAC

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is all, an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize in about many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. It stimulates the bowels, sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

CHAPTER X.—Continued.

"Close the door, Julie. There's a draught through here and it's going to rain. What time do you expect Mrs. Halliday? I suppose she wanted you tonight because of her company. Will they be here to supper?"

"Who? Mrs. Halliday ain't got no company. She ain't 'Julie,' who had cleaned house for everyone in Bakersville since Nick was a little boy, wouldn't have designed to say 'Mrs. Halliday'." "Waited soon as they eat breakfast. Mr. Halliday's away. Not comin' back till tomorrow. He's buryin' his ma."

Gay sat down rather weakly on the stairs.

"I know, but—but I thought she had company. I supposed that was why she didn't go to the funeral."

"You supposed wrong then. I heard her tell Mr. Halliday that she'd seen his ma had never liked her, she didn't see no reason why she should go. I felt kind o' sorry for her, because she said plain he was everyone's life said: 'Angela, I'd like you to go with me. What will Mary think? Mary's his sister—an invalid. She can't walk; but just then they see me in the new room and stopped talking.'"

Gay sat very still on the stairs. Her knees felt as though they wouldn't hold her up.

"Perhaps," she suggested, "perhaps they were to pick up her friends at the station."

But Julie's answer dashed this hope.

"No, they went in the small car, not the new one. Besides, Mrs. Halliday put up the lunch, and she only put up enough for two; stuffed eggs, cold chicken, salad sandwiches (every one in a separate piece of paper and the crusts sliced off), cake and—"

A flash of lightning and terrific crash of thunder interrupted. Little Nick, always nervous at any sudden noise, cried out, and even Sony, who had been taught not to mind the storms, scuttled close to his mother's skirts like a frightened chicken.

"Gee!" said Julie. "Glad I come over when I did. Say, let's get out of this dark hall. I'll turn on a light in the attic room."

Gay arose, her knees still strangely weak, and lifted her baby.

"Sonny, dear little boy, you go to Dad. There's nothing to be afraid of. Don't you remember what Daddy told you about Rip Van Winkle and the nine-pins? They must be having a splendid game today—Rip and the little brown men."

"I wish Daddy'd turn," said the boy wistfully. "I wish he'd turn."

Tears sprang to Gay's eyes.

"Maybe he'll come soon, darling," she comforted, but Julie, with characteristic tactlessness observed:

"And most likely he won't. They was goin' clear to the States. Falls. There hills is awful. That's why she wanted Nick to go. I guess, though I should think she'd stay at home, seeing that she ain't got no place to go."

3000-3001-3002-3003-3004-3005-3006-3007-3008-3009-3010-3011-3012-3013-3014-3015-3016-3017-3018-3019-3020-3021-3022-3023-3024-3025-3026-3027-3028-3029-3030-3031-3032-3033-3034-3035-3036-3037-3038-3039-3040-3041-3042-3043-3044-3045-3046-3047-3048-3049-3050-3051-3052-3053-3054-3055-3056-3057-3058-3059-3060-3061-3062-3063-3064-3065-3066-3067-3068-3069-3070-3071-3072-3073-3074-3075-3076-3077-3078-3079-3080-3081-3082-3083-3084-3085-3086-3087-3088-3089-3090-3091-3092-3093-3094-3095-3096-3097-3098-3099-3100-3101-3102-3103-3104-3105-3106-3107-3108-3109-3110-3111-3112-3113-3114-3115-3116-3117-3118-3119-3120-3121-3122-3123-3124-3125-3126-3127-3128-3129-3130-3131-3132-3133-3134-3135-3136-3137-3138-3139-3140-3141-3142-3143-3144-3145-3146-3147-3148-3149-3150-3151-3152-3153-3154-3155-3156-3157-3158-3159-3160-3161-3162-3163-3164-3165-3166-3167-3

Make some Hot Biscuits Today!

Make a dozen delicious biscuits this way. Sift together twice, 2 cups Purity Flour, 2 cups baking powder, 1 t. salt. Cream 1 t. each each of lard and butter and mix with the dry ingredients, using the tips of your fingers. Add 1/4 cup each of milk and of water, mixing with knife until you have a very soft dough. Pat out lightly on mislin board until 1/2-inch thick. Cut out and bake in hot oven for 15 minutes.

These biscuits—made with Purity Flour—will keep moist for several days and may be re-heated without getting dry.

DELICIOUS SAUSAGE ROLLS—can be made from the above dough, but use half the shortening. Roll to about 1/4-inch thick, cover sausage and roll to 1/2-inch, or until brown, in hot oven (375°).

MEAT PIE COVERINGS using same dough are extra tasty.

Western Cereals Mills Co. Limited
Toronto, Winnipeg, Calgary

Look for our Company's name on the Purity Flour sack. It is your guarantee of quality from a responsible milling concern.

WORLD HAPPENINGS BRIEFLY TOLD

A general world disarmament conference will be called in the latter part of January, 1932, the League of Nations Council has decided.

Marshal Henri Philippe Pétain, defender of Verdun, became one of the French Immortals by election to the French Academy, succeeding Marshal Foch.

His once Imperial Majesty, William Hobenzollern, on January 27, celebrated his 72nd birthday quietly at Doorn House in the Dutch village of his exile.

Maintenance of the present wage scale throughout industry is vital to the return of prosperity, is the belief of John L. Lewis, president of the United Mine Workers of America.

Captain Elmar-Paul Lundberg, Swedish aviator who rescued Captain Noble in the disastrous Italian flight, is dead of injuries received in an aeroplane crash.

The Salvation Army receives approximately 200,000 pounds (about \$1,000,000) for "social and emigration work" under the terms of the will of the late John Bromhead Holt, Lancashire aluminum and brass magnate.

The municipality of Ahmedabad, India, has decided to observe His Majesty's birthday, June 3, in protest against the "repressive policy of His Majesty's representatives." It is explained that the king personally was held in high regard.

The British Government has made formal representations to the U.S. State Department regarding "unfavorable conditions" under which British subjects are being held at some centres and particularly at Seattle, Washington, for deportation.

Preparations are being made for the taking of the 1931 census of Canada, where an army of government workers will visit every Canadian home and take note of the number, sex, religion, nationality and other details of the occupants.

Still Giving Out Decorations

Berlin Lawyer Proud Of Recognition From Ex-Kaiser

The former kaiser is still dishing out decorations although in exile.

"As a sign of my thankful recognition of your successful legal work and your proved true conviction in your right against malice and spite, I bestow upon you the cross of Knight of my Royal House Order of Hohenzollern (signed) Wilhelm Imperator Rex."

This is the text of the imperial certificate which a Berlin lawyer, P. Bloch, is proudly showing his friends.

How To Lose Fat And Get That Youthful Feeling

Over in Great Britain where a man is feeling "a bit of a fatter" and looking the "picture of health" they say:

"HE'S GOT THAT KRUSCHEN 11 HANGING."

That means he takes his little dose of Kruschen Salts every morning. It's the same in the U.S.A. in Germany—in Holland—in Australia—in South Africa, for Kruschen Salts are now sold the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary for health.

Take half a teaspoon in a glass of hot water before breakfast every morning, modify your diet and exercise regularly.

But don't miss a morning, for Kruschen not only purges the bowels, it stimulates the liver, kidneys and bowels in a splendid health-giving way, it purifies your blood-stream, and sends new life and activity to every part of your body.

DASH AND YOUTH

All Tingey models are created and sketched in Paris and the patterns are made in the world.

A black canton crepe that is versatile—youthful and extremely wearable, is the choice of the chic Parisienne for all-day occasions.

Today's model gives an idea of what is happening to pelumps. Note how it is lowered from the waistline and posed around the dress to make the essentially smart flat hipline even more prominent. The upward movement of the pelum at the front, contributes further alonging line.

A little shaped piece below the collar—"V" neckline and on the sleeves at the wrists are voguish.

This model is also charming in simple woollens, crepe satin or velvet. This pattern may be obtained in sizes 14 to 20 and 36 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or cash) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Switzerland Has Leaning Tower

The Tower of Pisa isn't the only leaning one in the world. Switzerland has a leaning tower, too, right in St. Moritz. It is the tower of the old town church, which has a very pronounced slant. It dates from 1377 and is the only part of the old church now standing.

Britain's new traffic law provides a minimum age limit of 16 instead of 14 for motorcycles.

MacMillan Planning Northern Expedition

Has Ordered Airplane For Use In Mapping Unexplored Area

Commander Donald B. MacMillan, veteran Arctic explorer, has revealed plans for an expedition this summer to explore ice-bound territory north of Labrador.

The commander has placed an order at Los Angeles, Cal., for an airplane to be used for mapping the unexplored area north of Nain, Labrador, and in which, he said, he hoped to reach the great ice cap of Baffin Land.

Charles Rochefort, Los Angeles plane designer, who went with MacMillan into the Arctic in 1926, will go along again as chief pilot.

MacMillan said three ships would carry a party of 50 men to Nain, the base of the expedition. They are his own auxiliary schooner, a similar ship carrying Dr. Alexander Forbes of Boston, and a third vessel under the direction of Sir Wilfrid Grenfell of St. Anthony, Newfoundland.

The first objective is a territory to the west of the coast line 250 miles north of Nain.

"With an aerial camera we can place this district accurately on our world map," MacMillan said.

MacMillan said he would sail on June 20.

Valuable Relic For National Museum

Old Indian Tomb Elaborately Carved

An Indian tomb, probably the last of its kind, has been received at Ottawa from British Columbia and will be added to the collection of almost priceless Indian relics in the National Museum.

The tomb is the work of some member of the Musqueams, a tribe of which only some 50 remain.

The discovery was made on the north shore of the Fraser River near Vancouver by Harlan I. Smith, Dominion anthropologist.

Elaborately carved, the relic takes the form of a wooden apse, carved on a boat-like platform about eight feet in length.

When found the upper part of the tomb, which is the choice of the artist, contained bones which were interred before bringing the relic to Ottawa.

The state of preservation indicates the tomb is about 75 years old. Only one other example of this type is known.

British Empire Fair

Fifty-Eight Canadian Firms and Institutions Will Have Exhibits

At Buenos Aires

Fifty-eight Canadian firms and institutions have submitted the Department of Trade and Commerce of their intention of exhibiting at the British Empire Fair, which will be held at Buenos Aires from March 14th to April 27th, which will be opened by H. R. H. the Prince of Wales. Every province is represented.

The state of preservation indicates the tomb is about 75 years old. Only one other example of this type is known.

SUNDAY SCHOOL LESSON

FEBRUARY 8

JESUS THE WORLD'S TEACHER

Golden Text: "As ye would that men should do to you, do ye also to them likewise"—Luke 6:31.

Lesson: Luke 6:31-35.

Devotional Reading: Proverbs 3:1-5.

Explanations and Comments

The Law of Love, verses 27-31.

It may seem to you that Jesus is talking about the worldlings upon whom He has been pronouncing His woes, to His followers, and commands them to be ruled by love in their treatment of their enemies.

The Greek word for "love" in our text is "agape". At the time when Jesus uttered these words, revenged wreaked upon an enemy was considered normal. How Clever gloated over the misfortunes of an enemy, he thought himself fortunate on his death bed to think that he could say that no one had done more good to his friends than he himself.

Love is the only way to win an enemy. Show your love by unselfishness. Love your enemies as well as your friends; by doing good to those who do evil to you as well as to those who treat you well; by lending to those from whom nothing is expected, and to those who will return the favor. And the treatment in that even if you do good to those that do good to you, it is not to sinners expect to receive as much in return as those of Christ far more is expected.

Kindness and Mercyfulness, 36:36.

Do all things—love your enemies, do them good and lend, never despairing—and your reward shall be great. We shall be sons of God, for He is kind toward the unthankful and evil. Be merciful even as your Father is merciful.

It is an attribute of God Himself. And earthly power doeth thus show great things, but they are not of God. When mercy season justice."

Be Charitable In Judgment and Generous In Giving, verses 37, 38.

Do not judge, and ye shall not be judged; and condemn not, and ye shall not be condemned; release ye, a debtor or offender, and ye shall be released. These are general statements which are not to be taken without qualification. The example of Jesus Himself is before us. He judged and condemned is a duty. Read the Golden Rule, and judge as you would that others should judge you.

An otherwise beautiful character is often seen almost repulsive by the single bad habit of censoriousness. It is one of the temptations of the good to indulge in harsh judgment of the faults of others. Cultivation of a stern conscience merely for the sake of haunting goodness is no more charitable, and no more heart-enriching and satisfying, than giving to make a display with money."

The Loudest Noise

A Montreal scientist says there is too much noise in the world, but he points out that the loudest sound of all is that made by the ticking of the clock in a store that does not advertise.

COUGHS-COLDS

Dangerous complications can quickly develop unless you get relief as soon as you feel the first signs of the cold.

SPOHN'S COMPOUND

Success! This Is Made Of The Coast Of England

A British Royal Air Force officer successfully landed a specially equipped airplane on the sea off Felixstowe, and the plane remained afloat long after the pilot, uninjured but drenched to the skin, was taken off by a rescue boat.

The plane used in the experiment was an ordinary service machine with certain modifications intended to keep it afloat for at least four hours after alighting on the sea. For this purpose the sides of the fuselage had been made to open outwards by operation of a lever in the cockpit. This was for the purpose of releasing air filled bags designed to keep the machine afloat.

Squadron Leader Goodwin landed the plane on the water he switched off the engine, emptied the gasoline tank and released the air filled bags. He was free from the usual safety belt in case things went wrong and he had to swim from the plane. In addition, he had padded the lower side of the top plane with sponge rubber to soften the blow in case it struck beneath the plane when the plane hit the water.

Inside the fuselage were bottles of compressed air communicating with the rubber and canvas flotation bags, which, when the sides of the fuselage dropped outward, were free to float beneath the top wing of the airplane, thus keeping the machine afloat.

The test worked well. Though the airplane, when it landed on the water sank for a few seconds until only a small part of the upper structure was visible. The flotation bags padded the lower side of the fuselage and the machine floated again and rescue boats took the pilot from the cockpit while the machine was left to complete a four-hour floating test.

COMBINES ACT HELD VALID BY PRIVY COUNCIL

London, England.—The Combines Act of the Dominion of Canada is valid, according to the judgment handed down by the Privy Council, dismissing an appeal from the Proprietary Articles Trade Association of Canada.

Thus the privy council backed the unanimous opinion of the Dominion's Supreme Court, which in a four-year legal battle and opened the way to several investigations of combines.

The case was argued before the privy council last June. The act was passed by the Federal parliament in 1919 to replace the 1914 act which had been declared invalid by the privy council.

The provincial governments of Quebec and Ontario both supported the contention of the Proprietary Articles Trade Association that the Federal act was invalid.

The P.A.T.A. also contested the validity of the section 486 of the Criminal Code of Canada, and in dismissing the appeal the privy council upheld the validity of this section.

The judgment said that in their lordships' opinion section 486 of the Criminal Code and the greater part of the Combines Investigation Act fall within the power of the Dominion government to legislate as to matters falling within the class of subjects in the constitution, including the procedure in criminal matters.

The substance of the act, the judgment continued, is to define and to make criminal combines which the legislature, in the public interest, intends to prohibit. The definition is wide and includes activities which have not hitherto been considered criminal.

"But only those combines are affected which are operated in a way likely to operate to the detriment or against the interest of the public" and if parliament genuinely determines that combines, as activities, which can be so described, are to be suppressed in the public interest, then their lordships see no reason why parliament should not make them crimes.

The criminal law, the judgment went on, is certainly not confined to what was criminal by the law of England or of any province in 1867, when Confederation was proclaimed. The power must extend to legislation to make definitions of new crimes.

It is not enough, however, for parliament to rely solely on its powers to legislate as to criminal law, the judgment added. The remedies given under sections 29 and 30, relating to the customs duty and revoking the patents, have no necessary connection with criminal law.

Their lordships have no doubt that they can both be supported as being reasonably ancillary to the powers given respectively under section 91. The judgment declared it is unfortunately beyond dispute that in a country where a general protective tariff exists, persons may be found to take advantage of the protection, and within its walls form combinations that may work to the public disadvantage.

It is an elementary point of self-preservation that a legislature which creates protection should arm the executive with powers for relaxing the protection if it is abused, the judgment declared.

The name reasoning applies to grants of monopolies under any system of patents. The view their lordships have expressed makes it unnecessary to discuss the further ground upon which the legislation has been supported by the reference to the power to legislate under section 91 "for the regulation of trade and commerce," the judgment continued.

Manitoba Seed Fair

Will Be Held In Conjunction With Winter Fair On March 16

Brandon, Man.—Judging by early inquiries, the provincial seed fair to be held in conjunction with the Manitoba Winter Fair, March 16 to 20, will be larger than ever. Now in its seventh year, the seed fair has grown by leaps and bounds and it craves the generous show space in the Arena building last year. As the fair is an opportunity for growers of surplus grain, grass or clover seed to get in touch with prospective purchasers, the exhibition is expected to have more than its usual interest in March.

Claim Commander Was Drunk

Crew of Canadian Vessel Twelfth Against United States Officer

New York.—Seamen from the Nova Scotia power boat "Josephine K" appeared before the consular board of inquiry to testify that Boatwain Karl Schmidt of the "CG-145" was drunk when he boarded the Canadian vessel after its capture near Ambrose Light. Schmidt, who had admitted he fired the shots, one of which fatally injured the boat's master, William Chert, Lanesburg, N.S., was in court and heard witnesses swear that after the capture he continued drinking in the forecastle of the run-runner.

Louis Selig, who described himself as an able seaman from Halifax, N.S., gave the main testimony for members of the crew. Schmidt, he said, seemed "good and drunk" when he saw him shortly after the "Josephine K" was boarded. The boatwain had pointed a gun at Allan Falkenhain, Lanesburg, and maintained he would have to shoot because Falkenhain's name did not appear on the ship's crew list. Schmidt, who was charged with the crew and his eyes "glaring," the commander of the "CG-145" stayed in the forecastle several hours, and while there consumed six bottles of ale and two drinks of rye whiskey, during which time all members of the "Josephine K" were given the opportunity to witness his conduct.

Seaman Allan Falkenhain said he thought Schmidt drunk; that he waved a gun and told him to get out, but told him that he didn't belong to the ship. Harry Jewell said: "He was under all over himself, and rolling around."

Mr. Churchill described the trades union as pampered pig with privileges on the new bill. The Laborites continually interrupted Mr. Churchill with ironical cheers.

"Why," Mr. Churchill asked in reference to Lewis, "why should a patriotic Socialist trades unionist have to subscribe to the political fund of the cosmopolitan Socialists? Why should a Catholic have to subscribe to a fund, perhaps, of an Apostate or an Atheist?"

These words brought a Labor storm.

"Pitiful argument," one Laborite shouted.

Mr. Churchill spoke of the Liberal decision not to vote as an outrage of the first order.

"What," Mr. Churchill asked, "has become of the Liberal traditions?" Here a Laborite interrupted, pointing at Mr. Churchill said: "It's not a tradition; he's an extrader," and a roar of laughter went up from the house.

The Liberals had compromised on the bill, Mr. Churchill added, they might not dislike it like in the House of Commons, but they were going to hate it like poison "poison." Mr. Churchill finished by comparing Prime Minister MacDonald with the "boresome word" of a circus.

A new law makes compulsory the establishment of a public library in every municipality of Czechoslovakia.

Asking Lower Freight Rates

B.C. Government Will Back Growers and Farmers in Fight

Victoria, B.C.—The government will get behind British Columbia growers and farmers in their fight for lower freight rates to the prairies. Premier S. P. Tomin has instructed Leon J. Lander, K.C., government rate counsel, to co-operate with the growers and farmers in commencing proceedings before the railway commission immediately.

"Vegetable growers of British Columbia, backed by the canning industry, appealed to the government in strong terms recently to rescind them from a threatened reduction in growing acreage, by about 50 per cent this year, by an immediate reduction in freight rates from here to prairie markets."

To this end a large delegation urged the cabinet to appoint a counsel, and file an immediate application with the railway commission for a cut in western rates to the level of those prevailing from Ontario to the prairies.

It was expected the government would follow this plan and launch a new rate fight without delay.

Increase In Gov't Employees

Regina, Sask.—An increase of 351 in the number of employees in the various departments of the government over the number employed at the same time last year is shown in a return to the order of the assembly. This return includes the employees of the liquor board, the farm loans board and the power commission.

MAJORITY FOR LABOR ON TRADES DISPUTES BILL

London, England.—In a packed and excited House of Commons the government got through the second reading of the Trades Disputes Bill by a majority of 27.

The government majority was larger even than had been expected. Only seven other Liberals voted with the bill and the rest abstained from recording their opinion.

As soon as the result of this vote was announced, Rt. Hon. Stanley Baldwin, Conservative chief, moved that the bill be referred to a committee of the whole House.

Again, the House divided. This time, however, the majority of the Liberals voted with the government, and the MacDonald majority rose to 52. The net result is that the parliament of Westminster—that the bill will go "upstairs" for committee consideration clause by clause. The bill will be passed in a standing committee instead of the committee of the whole where the possibility of a government defeat on a matter of detail is always present.

The final day's debate on the bill passed in breezy style with Rt. Hon. Winston Churchill on his feet. He rambled along with the contributions of back-benchers during the dinner pause and ended snuggly with Rt. Hon. H. H. Thomas, the secretary of state for the Dominions.

"This announcement implements the decision reached at the Trades Disputes Conference regarding the precedence to be accorded to the high commissioners."

Position of the Dominion's representative, in relation to a minister of the crown visiting the United Kingdom in a few days on a trip overseas, the minister being given precedence immediately before the high commissioner concerned.

Heads Canadian Flying Club

Manager Of Royal Bank At Fort William Elected President

Montreal, Que.—H. R. Richards, manager of the Royal Bank of Canada in Fort William, Ont., was elected president of the Canadian Flying Club Association at the close of the annual convention here. He succeeds J. A. Sully, of Winnipeg. Other officers were elected as follows:

Vice-president for the Maritime provinces: R. J. R. Nelson, manager of the Halifax Shipyard, Halifax, N.S.; vice-president representing Ontario and Quebec: A. Sidney Dewar, Montreal; vice-president, representing the western provinces: James A. Bell, president of the Edmonton Flying Club, Edmonton, Alta.; treasurer: H. P. Crabb, Winnipeg, president of the Winnipeg Flying Club.

At the annual convention, and no public announcements were made at the close, beyond the list of officers.

Winning Alberta Communities in C.N.R. Progress Contests

Announcement of the first year's results in the Canadian National Railway community progress competitions for European settlements in Alberta, shown Norma, Ukrainian community near Vegreville, Brookside school near Vegreville, farm home of Frank Mohler in Lloyd-Gregory district, farm home of R. W. Shenkel in Lloyd, the community hall in the Ukrainian settlement at Mundare, and the Clifford school in Unity Municipality.

The shipping trade is greatly depressed at present, and from inquiries already received, vessel owners are evincing considerable interest in the possibilities of the Hudson Bay route. No great difficulty, therefore, is anticipated in procuring private vessel owners in the business that the test voyage will afford and considerable prestige may be expected to accrue to the shipping company having the honor of handling this first commercial movement of grain out of Western Canada's new port.

It is too early as yet to speak definitely as to either freight or insurance rates, but arrangements are being made to see that that aspect of the situation is thoroughly canvassed, and at the proper time the minister expects to be in a position to meet any eventuality which may develop. Meanwhile, both he and the officials of the department feel that there is no question but that it will be possible to demonstrate, this coming fall, that the facilities of the port will be available and capable of taking care of the business which will be attracted to the port on the inauguration of the route at the opening of the 1932 season of navigation."

Passengers Ordered Deported

Britishers On C.F.R. Ship Barrow From Landing in Canada

Vancouver, B.C.—Two passengers of the liner "Empress of Russia," which arrived here from the Orient, have been ordered deported by an immigration board of inquiry. Appeals have been lodged in Ottawa against the rulings.

Captain Little was just discharged from the ship when he was informed of his way to join relatives in Toronto. Mercer, from Shanghai, an engineer of the steamer "Hedwig," which was wrecked a few months ago off Canada, said he intended to settle in Canada.

The deportations were ordered under the government regulation which bars all but practical farmers and wives of bona-fide Canadian residents from entering the country.

Mining Men To Meet

Delegates From All Parts Of Canada And U.S. To Attend

Ottawa, Ont.—Delegates from all parts of Canada and some from the United States are expected to attend the annual meeting of the Canadian Institute of Mining and Metallurgy, from March 4 to 6. Papers on the latest developments in Canada's mining industry will be delivered and many social functions have been arranged.

G. G. Duncan will present a paper on exploration work in the north west territories, particularly around the Coppermine River. J. P. Noye will refer to developments around the Bar Lake and John Dryburgh will speak on the nickeliferous ores of the west coast of Hudson Bay.

Russia could not produce as good spring wheat as Canada, Trellis said, "they have the climate and the soil, but not the organization," he explained. "They are using our brains and our experience."

Ottawa, Ont.—Preside of Canadian grain on world markets must be regained before the troubles of the world can be dry when bread, said Herman Trellis, of Winnipeg, Alberta, world's wheat king.

Mr. Trellis, who with Mrs. Trellis is leaving in a few days on a trip overseas, called on Dr. J. H. Grisdale, deputy minister of agriculture, and emphasized the necessity of concentrating on Margins and earlier types of wheat.

"The difficulty of the west," Mr. Trellis said in an interview, is that the farmer has been trying to accommodate the combine harvester to wheat which is not of the type of wheat suited to the combine.

"Farmers have been using the combine to harvest late maturing wheat, which was dry when threshed and the effect has been to destroy the prestige of our grain."

It was the year of the combine, Mr. Trellis said. "The farmer will take what he can get for it and then start all over again."

Apparently the minister felt that the farmer has been trying to accommodate the combine harvester to wheat which is not of the type of wheat suited to the combine.

"Farmers have been using the combine to harvest late maturing wheat, which was dry when threshed and the effect has been to destroy the prestige of our grain."

It was the year of the combine, Mr. Trellis said. "The farmer will take what he can get for it and then start all over again."

Apparently the minister felt that the farmer has been trying to accommodate the combine harvester to wheat which is not of the type of wheat suited to the combine.

"Farmers have been using the combine to harvest late maturing wheat, which was dry when threshed and the effect has been to destroy the prestige of our grain."

CHAMPION CHATTER

Vol. 4

Thursday, Feb. 8, 1931

No. 7

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

"Did ever see thuh we sick?"
"No, but I seen the ocean blue."

You are invited to be our guests and to attend the Farmers' Meeting in Champion Community Hall on Monday, Feb. 9th, at 2 p.m.

Blood: Perfectly devastating cathedral—Gothic, isn't it?
Unpreferred: No, the guide book says its Catholic.

"Gee, that girl is skinny?"
"Now, people don't use that expression in the best places."

"I know, but that's where she's skinny?"
And then there was the sweet young thing who when told that an effort was being made to revive Shakespeare, declared she didn't even

know he had been on the party.
Win Penn Motor Oil: "Still the Best."

A Frenchman and an Englishman were having quite an argument at a trading post in Canada.

"Well," said the Englishman, "you don't ever see any half-breed English."

"The squares had to draw the line somewhere," replied the Frenchman.

Baboon: Where to burin, sweet.
Gibbon: Why the can come in and hear Roy Smith on Monday at 2 p.m.

Thaw the old cow cover the fence some hay and hear Roy Smith on Monday at 2 p.m.

That Helen is artistic I know when we encounter her.

She has a taste for painting.
I see it in her face!

Don't forget the Mc-Dug. broadcast Thursday evening at 8 p.m. over CJOQ.

"D'ya know anything about surveying?"
"Now, I never even looked through a theodolite."

News of the death of Mrs. Oscar Sletto's and Sandy Watts' mother was received on Friday.

Our heartfelt sympathy goes to families of those bereaved.

Lady: "Can you give me a room and bath?"
Clerk: "I can give you a room, madam, but you will have to take your own bath."

"Good Equipment Makes a Good Farmer Better."

Local and General

G. F. Smith's friends will be sorry for his illness and hope for a speedy recovery.

Be sure and attend the St. Valentine's dance on Wednesday Feb. 11. Good music.

It is claimed that lumber from Russia is replacing Canadian exports to Great Britain.

Mrs. C. Hyndman and Mr. and Mrs. W. C. Fry of Calgary are in town for the Old Times' dances.

A. B. McGillivray of Edmonton, engineer on the C.N.R., was fatally injured by falling from his engine.

Mr. and Mrs. W. Lumsden of Golden B.C. have been guests at the home of Mr. and Mrs. A. McCullough.

Mr. and Mrs. T. Swartz of Calgary are visitors with Mr. and Mrs. Greg. Fath and other friends in the vicinity.

After spending several million dollars on a rubber plant in South America, Henry Ford has abandoned the project.

Mr. and Mrs. J. Hagerman and Mrs. Clements motored from Calgary on Thursday to attend O.E.N. Chapter.

Roy Doyle's sixth birthday was celebrated on Monday and a number of her friends were entertained on the occasion.

The inquiry into the death of Capt. Cluett of the Joazeiro K. by a United States board, has found the shooting justified.

Dr. A. L. Shanks, for six years medical officer on the Hudson Bay Railway, died in a fall from the musky special at Mile 114.

Chal, Matlock and family moved to the farm on Monday. The wonderful weather is bringing on the spring exodus earlier than usual.

Mrs. Swartz was the winner of the first prize at the whist party held at the home of Mrs. A. Becker last week. Mrs. Wilcher was reported as the winner by mistake.

K.R. McLean, R.O. of McLean & Anderson, Sight Specialist 224-8th Ave. West, Calgary will make his monthly visit to Champion Friday, February 27, at the Drug Store.

Mrs. J. McLeod and Mrs. Healy of Brant were guests at the home of G. M. Campbell. Mr. McLeod has been ill for several months and is still under the care of his Mayo doctors at Rochester, Minn.

Ivan Thompson and Donald McKenzie were victims of a plane crash at Lethbridge.

Reorganization of the Brownlee cabinet will be undertaken in the near future.

Mrs. G. A. Manhard has returned from a two weeks' visit to her daughter at Blackfalds.

A. Hopkins and family are moving to the farm. This is one of the sure signs of spring.

David McKnight has taken the Estevan seat in the Saskatchewan legislature which he abandoned to Norman McLeod when it was found the ballots had been tampered with before the recount.

Mrs. J. D. McDougall wishes to thank the Women's Institute and Ladies' Aid and Miss Willies for flowers and Mr. and Mrs. McCullough for fruit sent and also kind friends that called during her illness.

Mrs. R. S. Bond and Mrs. Frank Caldwell entertained at bridge on Thursday evening, Jan. 29th, when a specially pleasant evening was spent by a large number of guests. The prizes were won by Mrs. A. Goetz, Mrs. W. Ulrich and Mrs. A. Jopling, first, second and consolation respectively.

Mrs. Freeze entertained at an attractively arranged luncheon on Wednesday complimentary to Mrs. Ryan. The smartly appointed tables were centred with spring flowers in pastel shades and yellow tulle added to the decorative scheme. Bridge was enjoyed during the afternoon and the honors were won by Mrs. Maffett and Mrs. Dow.

The Chronicle has been accused of sarcasm in respect to Jas. Brown as a school trustee, but in the widest imagination possible to the editor he never dreamed that Jim would stop a perfectly good school, running at a cost to the district of \$15.00 per hour, in order to examine the efficiency of the fire drill in vogue. The same investigation could have been made at noon or four o'clock without disturbing the scholars or aggravating the teachers. Will someone tell just what business a school trustee has to be around the school premises during school hours, anyway?

The Champion Women's Institute will hold its regular monthly meeting at the home of Mrs. A. W. Jopling on Feb. 10th. Roll call—"How to be neighborly." Mr. R. I. Baker will address the meeting on—

"The New Type of Secondary Education." Members are reminded to meet punctually at 2:30 p.m. and any women interested, will be made welcome. Refreshment convener Mrs. Wise.

Wheat Pool Notes

The Alberta wheat pool will conduct a referendum on the question of an one hundred per cent pool next summer when the annual election of delegates is being held. A ballot will be sent to each member on which the following question will be asked: "Are you in favor of an One Hundred Per Cent Pool by legislation?"

The Canadian Milling Journal: It is strange that the farmers in Western Canada are urged to abandon their Wheat Pool and go back to the old system while in other countries (notably Argentina) the farmers are denouncing the old system and demanding Pools.

W.I. and L.A.
Honor Mrs. Ryan

Mrs. R. S. Ryan who is shortly leaving to reside in Warner was the guest of honor at a gathering sponsored by the Ladies' Aid and the Women's Institute at the home of Mrs. Latiff on Saturday afternoon, January 31st. Mrs. Ryan has been associated with these organizations for eight years, and in appreciation of her work and interest, was presented with a silver basket of pink and white carnations by Mrs. J. N. Beaubien.

A programme which was presided over by Mrs. P. C. Alcock, greatly added to the pleasure of the guests. Mrs. McLean rendered two vocal selections, violin solos were contributed by Miss A. Lucia and two readings by Mrs. Bastin. Mrs. Williamson delighted everyone with her original faraway poem dedicated to the parting guest.

United Church Annual

(Continued from front page.) Intellectual, social, religion, in life. The Sunday school has a membership of 61, with 9 teachers and three officers making a total enrolment of 63. The offerings amounted to \$226.40. The choir with 12 members is rendering a service of song under the leadership of Mrs. McLean which is appreciated by all. The Ladies' Aid reported \$640.20 for the year's earnings. Of this \$300 was given to the budget of the church. The board of managers for 1930 was re-elected for 1931. Bursaries contributed \$20.70 towards the church budget. Sundersen \$55.50 and Champion \$113.44. The missionary and maintenance fund received \$55.35. The total earnings of the church amounted to \$2430.00. The minister appreciates the efforts of all and the spirit of co-operation prevailing throughout all the organizations and we look forward to a year of continued success and blessing.
